THE REPLY FILED <u>25 April 2005</u> FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.							
The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:							
a) The period for reply expires 3 months from the mailing date of	the final rejection.						
b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  NOTICE OF APPEAL							
2. The Notice of Appeal was filed on A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

U.S. Patent and Trademark Office PTOL-303 (Rev. 4-05) Continuation of 11. does NOT place the application in condition for allowance because: The declaration of Napoleone Ferrara, Ph.D. et al., is not sufficient to remove the prior art of record. Exhibit A referred to therein has not been presented for consideration. Further, the scope of the declaration is not commensurate with that of the rejection and claims over 80%-99% encoding sequences. The declaration further refers to a PRO 320 polypeptide of SEQ ID NO:140 identified by pin number P288-1. However, the declaration does not clarify that this PRO 320 polypeptide is the same as instant SEQ ID NO:119. Further, evidence to possession of the polypeptide is not commensurate with polynucleotides or encoding sequences. All rejections are maintained for the same reasons of record.
